THE HOLBECK CHARITABLE TRUST

The Holbeck Charitable Trust is delighted once again to be a Headline Sponsor of York Festival of Ideas. Now in its ninth year, the Festival continues to go from strength to strength.

The 2019 programme offers a huge range of stimulating and diverse events, talks, performances, exhibitions and workshops. We congratulate the Festival on its determination to remain as widely accessible as practicable by staging so many events where entry is free.

As a continuing sponsor, we are proud to support the team's ambition to develop a Festival which, in time, will become a mainstay of the national cultural calendar.

A WORLD OF WONDER

Welcome to the award-winning York Festival of Ideas – our 2019 programme offers more than 200 inspiring events under the banner of 'A World of Wonder'.

In just nine years York Festival of Ideas, led by the University of York, in partnership with more than 100 partners, has become one of the largest free festivals of its kind in the UK. We thank all our donors and partners for making this possible.

We are all driven by a passionate belief that education and ideas transform lives. The Festival celebrates the incredible power of the imagination, showcases the ability of humans to tackle seemingly impossible questions through research, collaboration and creativity, and pays tribute to those people who have achieved the unimaginable.

In a world which seems more divided than ever, bringing different voices and opinions to share ideas and inspire change is integral. Our Focus Days will explore complex issues including toleration, poverty and how to deliver a fair economy for all. We question the contribution of higher education to society; the relationship between creativity and science; and the ability of artificial intelligence to improve lives. We examine how cultural identity in France and Britain is expressed by food, fashion and feminism.

Our launch day will feature a live broadcast by BBC Radio 4 *Today* at the University of York. Our launch evening, in partnership with York Minster, features humanitarian Terry Waite, Astronomer Royal Martin Rees and broadcaster Misha Glenny, with thought-provoking talks on the future of humanity in the context of creativity, climate change, cybersecurity, and the seemingly inexorable polarisation of society.

We are proud to have attracted a plethora of renowned speakers, including filmmaker Mike Leigh; diversity and inclusion champion Heather Melville; *Poldark* scriptwriter Debbie Horsfield; poet Paul Muldoon; broadcaster Gavin Esler; the Radio 3 New Generation Thinkers; economist David Blanchflower; chef Frances Atkins; V&A 'Dior' curator Oriole Cullen; social geographer Danny Dorling; and historian Tracy Borman – to name but a few. We know they embody the Festival's ethos to 'educate, entertain and inspire'; and they will, in turn, be inspired by our vibrant, engaged and enthusiastic audiences.

As WB Yeats observed, 'the world is full of magic things, patiently waiting for our senses to grow sharper'. We hope very much that your senses will be 'sharpened' by our programme.

We will never stop being curious!
